

# Time Management

## What is Time Management?

It is understanding ***exactly*** how much time we have and how to use it effectively.

Then what is the purpose  
of *good* time  
management?

*Good* time management is  
a useful personal skill for  
managing oneself,  
one's work and the work  
of others.

- Time is an “ineffable resource” which is finite.
- Time control is a paradox as you can **MANAGE** only yourself in relation to time.

# Core Principle of Time Management

*Concentrate on results  
and NOT  
on being busy*

Your goals and priorities  
are the foundation  
of professional fulfillment

*Plan for the future  
because that's where  
you're going to spend the  
rest of your life.*

Mark Twain

# Personal Goal Setting

*“Planning to Live Your Life Your way”*

Goal setting is an important method of:

- Deciding what is important for you to achieve in your work.
- Separating what is important from what is irrelevant.
- Motivating yourself to achievement.
- Increasing your productivity based on measured achievement of goals.

# Types of Goals

- ◆ Rational goals (specific short term)
- ◆ Directional goals (general goals for long term)
- ◆ Muddling thru (best option when the environment is in flux)

# Four Most Popular Time Robbers

- ◆ Phone Interruptions
- ◆ Unscheduled Visitors
- ◆ Too Much Information
- ◆ Travel

*Unless you identify the principle culprits (of Time Robbers) and create a plan for eliminating them you will continue wasting time in the same pattern every day for the rest of your life.*

# Multitasking

**Multitasking**  
actually makes you  
less efficient than if  
you concentrated  
on one thing at a time.
